Application for Case Manager

Selarang Halfway House | Yellow Ribbon Industries Pte. Ltd.

John Tan | Singapore | +65 9889 1383 | sxk2929@gmail.com

Dear Senior/Assistant Director (Programme) and Lead Case Manager,

I am writing to express my strong commitment to join Selarang Halfway House as a Case Manager under Yellow Ribbon Industries. The mission to deliver meaningful rehabilitation and reintegration programmes for residents under the Community-Based Programme (CBP) represents the precise purpose and dedication driving my career transition into social service.

I am currently pursuing the Graduate Diploma in Social Work at Singapore University of Social Sciences (SUSS), strengthening my theoretical, ethical, and clinical casework foundation in direct practice, group work interventions, and multi-disciplinary collaboration. This builds directly on my Diploma in Social Service from Hua Mei Training Academy, Tsao Foundation. Currently serving as a Programme Associate at NTUC Health Active Ageing Centre, I actively engage clients through holistic needs assessment, psycho-social group facilitation, volunteer coordination, and timely community referrals.

The Selarang Halfway House Case Manager scope calls for a unique synthesis of empathy, field presence, and administrative rigour. My background is uniquely equipped for these responsibilities:
- **Psychology-Informed Programmes & Group Work:** Experienced in group facilitation utilizing cognitive-behavioural and motivational interviewing concepts to support residents through behavioural change.
- **Reintegration & Employer Engagement:** With senior corporate leadership experience at Citibank and ABN AMRO, I communicate with confidence and diplomacy with corporate and SME employers during job-site visits, mediating workplace friction to sustain employment.
- **SPS Collaboration & Case Conferences:** Accustomed to multi-agency alignment and objective reporting, ensuring seamless co-case management with Singapore Prison Service (SPS) Reintegration Officers.
- **Statutory Records & Reporting:** Six years of software engineering at ST Engineering embedded an uncompromising standard of data integrity, structured case notes, and timely statutory compliance.

I resonate profoundly with the Yellow Ribbon philosophy of 'Beyond Second Chances'. I believe that every resident who enters Selarang Halfway House possesses the capacity for lasting transformation when provided with structured rehabilitation, genuine respect, and reliable follow-through. I am prepared to contribute with humility, high energy, and unwavering dependability.

I would welcome the privilege of an interview to discuss how my SUSS social work training, ground community practice, and executive operating maturity can serve the residents, team, and mission of Selarang Halfway House.

Respectfully yours,

John Tan
